## **WISCONSIN EMPLOYMENT & UNEMPLOYMENT ESTIMATES ANNOUNCED: APRIL REVISED, MAY PRELIMINARY**

MADISON – The Department of Workforce Development (DWD) today released the U.S. Bureau of Labor Statistics (BLS) revised estimates for April and preliminary estimates for May, covering unemployment and employment statistics for the state of Wisconsin. In brief, the estimates showed:

- **Place of work data:** Upward revisions to seasonally adjusted total nonfarm and private-sector job numbers in April by 1,700 and 1,900, respectively.
- **Place of residence data:** A preliminary seasonally adjusted unemployment rate of 6.8 percent in May. In addition, there was an increase in the state's labor force participation rate, which shows a greater share of Wisconsin's population is in the labor force either working or actively seeking employment.

The BLS monthly place of work data is based on a monthly survey of approximately 5,500 Wisconsin employers (3.5 percent), called the Current Employment Statistics (CES).

BLS monthly place of residence data is based on Unemployment Insurance claims and a monthly survey of 1,450 Wisconsin households (0.06 percent), called the Local Area Unemployment Statistics (LAUS).

Preliminary May totals for LAUS and CES will undergo further revisions in the next several weeks. Revised totals for all months in 2012 and the second half of 2011 will undergo further refinement during an annual benchmarking process in early 2013.

The most accurate count of jobs data, the Quarterly Census of Employment and Wages (QCEW), is available through December 2011. This data is based on a census of approximately 96 percent of Wisconsin employers. It shows net job growth (total nonfarm) of 23,608 in Wisconsin from December 2010 through December 2011.

Other indicators that help illustrate the state of Wisconsin's economy include:

- [Department of Revenue](#) individual income tax revenue collections: up by more than 4.3 percent through May (FY 2012).
- [Department of Financial Institutions](#) new business formation: up this year by 11.7 percent over the prior year.
- A decline this calendar year in initial and weekly DWD [Unemployment Insurance claims](#).

Attached to this report are tables that show the (1) April-May LAUS and CES revisions; (2) preliminary May estimates for LAUS and CES; (3) the CES revision history for calendar year 2011; and (4) QCEW for the fourth quarter of 2011, which is the most recent quarter available.

\*Differences in total may occur as a result of rounding.

(1) Includes Labor Market Disputes

(P) = Prelim; (R) = Revised

Source: Local Area Unemployment Statistics and Current Employment Statistics programs, Labor Market Information Section.

**Cautionary note to users:** Revised methodological procedures mandated by the U.S. Bureau of Labor Statistics (BLS) force individual state estimates of employment into closer alignment with the national estimate. This change results in larger month-to-month employment change for the states and the information reported by DWD.
